Summary of Additional Information of Missing Air Crews
on Mission of 15 August 1944.

All eyewitness descriptions pertaining to the missing aircraft are being consolidated and the following circumstances surrounding the loss of these aircraft are summarized below:

1. Attached is a formation diagram showing the position of all aircraft in the Low Group. Also shown are the missing aircraft as well as aircraft that returned to base.

2. Due to the position of the Combat Wing, namely, Low group position, there were few observations by crew members in the Lead and High group positions pertaining to the missing aircraft.

3. Statements vary as to the number of chutes seen. The greatest number of chutes observed by any one crew was fifteen (15). Other reports by returning crews stated the number of chutes seen as being 1, 4, 6, 8 and 9.

4. Incomplete reports by crew members makes it difficult to determine the condition of many of the lost aircraft. Some were reported as exploding in air, others observed going down in flames. The aircraft flying in #2 position (Charnick, #42-97085), was reported as having 4 engines on fire. Two chutes were observed coming from this aircraft.

Aircraft flying in #3 position (Goss, A/C # 42-31183), was reported as straggling and the first to be attacked by E/A. This aircraft was reported as going down in flames. No chutes were reported coming from this aircraft.

The lead aircraft (Stein-Litman, A/C # 43-37838), was observed going down in flames. No chutes reported as having been seen.

5. Reinterrogation of the four crews that returned as well as selected crew members from the Lead and High groups did not result in any additional data as to the missing crews.

19 August 1944.

Summary of Additional Information of Missing Air Crews on Mission of 15 August 1944.

All eyewitness descriptions pertaining to the missing aircraft are being consolidated and the following circumstances surrounding the loss of these aircraft are summarized below:

1. Attached is a formation diagram showing the position of all aircraft in the Low Group. Also shown are the missing aircraft as well as aircraft that returned to base.

2. Due to the position of the Combat Wing, namely, Low group position, there were few observations by crew members in the Lead and High group positions pertaining to the missing aircraft.

3. Statements vary as to the number of chutes seen. The greatest number of chutes observed by any one crew was fifteen (15). Other reports by returning crews stated the number of chutes seen as being 1, 4, 6, 8 and 9.

4. Incomplete reports by crew members makes it difficult to determine the condition of many of the lost aircraft. Some were reported as exploding in air, others observed going down in flames. The aircraft flying in #2 position (Charnick, #42-97085), was reported as having 4 engines on fire. Two chutes were observed coming from this aircraft.

Aircraft flying in #3 position (Goss, A/C # 42-31183), was reported as straggling and the first to be attacked by E/A. This aircraft was reported as going down in flames. No chutes were reported coming from this aircraft.

The lead aircraft (Stein-Litman, A/C # 43-37838), was observed going down in flames. No chutes reported as having been seen.

5. Reinterrogation of the four crews that returned as well as selected crew members from the Lead and High groups did not result in any additional data as to the missing crews.
