STATEMENT OF 1ST LT. CLINTON A. MOSER, FLYING IN THE LEAD POSITION OF THE LOW GROUP ON MISSION OF JULY 19, 1944.

I was flying lead of the low group, 19 July 1944 and saw A/C #583 "C" for Charlie destroyed by enemy fighter.

On the turn away from the target, the A/C piloted by Lt. Boyce was straggling from his position in the high group, evidently from flak damage acquired on the bomb run as one of his port engines was smoking.

The E/A, an Me 109 came in on the port from high and six o'clock gave him a long burst and looked as though he was going to peel away when he changed his mind, turned back and gave another short squirt and peeled away below in a split-S, zoomed up and looked as though he was going to make another pass.

At this time the Me 109 was engaged by one of our fighters, a P-51, and after one pass, both fighters were last seen diving below in a dog fight.

The damaged fort came across to the right and above our group and at that time I saw four men come out. None of them opened their chutes that I could see from my position in our A/C.

Clinton A. Moser

CASUALTY QUESTIONNAIRE

1. Your name Robert G Taylor Rank 1st Lt Serial No. O-705060

2. Organization 303BG (H) Gp Commander Kermet Stephens (full name) Rank Col Sqn CO ----- (full name) Rank Major

3. What year 1944 month July day 19 did you go down?

4. What was the mission, Munich , target, Holdsveiglesgroith , target time, 1130 aprox , altitude, 29000 route scheduled, as planed , route flown same

5. Where were you when you left formation? Just turning off release point

6. Did you bail out? Yes

7. Did other members of crew bail out? As far as possible to accertain. Tail was shot up and was in mild spin. Intercom shot out but bell system worked in nose.

8. Tell all you know about when, where, how each person in your aircraft for whom no individual questionnaire is attached bailed out. A crew list is attached. Please give facts. If you don't know, say: "No Knowledge". All personnel from bomb bay forward bailed out and were POWS. No injury to any except myself(20mm frags) Their statements will be far more descriptive than any that I can give.

9. Where did your aircraft strike the ground? In the center of a very small village SW of Munich. Exploded on contact destroying the mayority of the town square.

10. What members of your crew were in the aircraft when it struck the ground? (Should cross check with 8 above and individual questionnaires) As far as possible Ican be positive -None. The location of the tail gunner is to uncertain to be sure. Certain the others were killed on the ground

11. Where were they in aircraft? See above

12. What was their condition? Unknown . From dammage to tail I think instantly killed.

13. When, where, and in what condition did you last see any members not already described above? I saw 6 chutes in the air as I free fell. My self and two others free fell for the larger portion of 20,000 ft. this would also indicate that the tail gunner was killed and that the remainder were killed on the ground

14. Please give any similar information on personnel of any other crew of which you have knowledge. Indicate source of information. None

(Any additional information may be written on the back)

(OVER)

6-3862, AF

When I reached Dulag Luft the interrogators in attempting to interrogate told me that the bodies of 7 of my crew were found in a small lake. This was impossible as I knew of 2 others beside myself that had been captured and we were carring a crew of 9. Later talks with other POWs that were shot down in the same area and time would support the contention that they were killed by civilians in the area that they landed in. The wind would drift them near the city of Munich and it seems rather likely that they did not delay jump. THIS IS COMPLETELY OPINION AND I CANNOT SUPPORT IT BY DOCUMENTARY EVIDENCE.
